REMARKS/ARGUMENTS

Upon entry of this Preliminary Amendment into the above-identified Continuing Application, claims 1-6, 9-15, 17-21, and 24-25 will be under active consideration in the application.

The claim of priority has been amended to add a claim of priority from U.S. Patent No. 10/180,166. Claims 7-8, 16, and 22-23 have been cancelled without prejudice. No new matter has been entered into the application as a result of these additions to the application.

Applicant has amended Fig. 5 to correct an inadvertent error in the drawing. More particularly, Applicant has added reference numeral -- 70 -- to Fig. 5, and redirected reference numeral -- 65 --. Reference numeral 70 refers to an evaporator plate and reference numeral 65 refers to an evaporator portion of a second loop thermosyphon 66. Support for this correction to the drawing may be found throughout the specification and claims, and particularly at paragraph 0031 of the specification. No new matter has been added to the application as a result of this correction to Fig. 5. Thus Fig. 5, as amended, along with the specification clearly teach "*...a second evaporator plate(70) positioned between a condensing portion (60) of the first loop thermosyphon (42) and an evaporator portion (65) of a second loop thermosyphon (66)....*" Accordingly, Applicant respectfully requests the entry of amended Fig. 5 into the application.
